

POISON: KEEP OUT OF REACH OF CHILDREN

Primary Constituent: Calcium Chloride

Directions

Use in areas where the presence of calcium and magnesium salts are low (soft water areas). Poolmaster Water Hardener raises the water hardness level to help prevent corrosion of pump and heater parts and etching and staining of plaster/concrete pool finishes.

Dosage

Add 135g per 10,000L for an increase of 10ppm.

Desired Increase	Quantity to add per 10,000L
10ppm	135g
25ppm	338g
50ppm	675g
100ppm	1,350g

poolmaster

Water Hardener
